

Animals in the Book of Mormon

There are many animals mentioned in the Book of Mormon. Do you know what a curelom or cumom is? All we really know is that they were both very useful to the Jaredites.

Have you ever heard of the deseret? This is another name for the honeybee. The Jaredites brought swarms of bees with them when they crossed the ocean. At that time, the bees were stingless. Honey has been found that is more than 1000 years old. After all those years, the honey is still perfect.

Using your Book of Mormon, look up the following verses and use them to unscramble the names of the animals below.

Ether 4:20

2 Nephi 9:121

Ether 3:12

Ether 1:23

2 Nephi 12:93

Ether 4:21

2 Nephi 8:36

3 Nephi 6:18
